Volume 30 • 1968

ACADEMIC PRESS

New York and London

COPYRIGHT © 1968, ACADEMIC PRESS INC.

No part of this volume may be reproduced in any form, by photostat, microfilm, or any other means, without written permission from the Publishers.

Made in the United States of America

Contents of Volume 30

Number 1, January 11, 1968

W. P. Aston, A. S. R. Donald, and W. T. J. Morgan. Oligosaccharides Containing A (1-6) Glycosidic Linkage Obtained from Human Blood-Group Specific Glycoproteins 1

Gerhard Huber and Georg Nesemann. Moenomycin, an Inhibitor of Cell Wall Synthesis 7

Walter A. Susor and William J. Rutter. Some Distinctive Properties of Pyruvate Kinase Purified from Rat Liver 14

C. L. Greenstock and H. E. Johns. Photosensitized Dimerization of Pyrimidines 21

Zippora Gromet-Elhanan. The Inhibition of Photoreactions of Chloroplasts by Ioxynil 28

Bennett M. Shapiro and E. R. Stadtman. Glutamine Synthetase Deadenylylating Enzyme 32

L. A. Menahan, B. D. Ross, and O. Wieland. Acetyl CoA Level in Perfused Rat Liver during Gluconeogenesis and Ketogenesis 38

François Richaud and Georges N. Cohen. Selection of *Escherichia coli* Mutants Devoid of One or of Both the Activities Carried by a Multifunctional Protein 45

William T. Morgan and John P. Riehm. The Isolation and Some Enzymatic Properties of DES-Arginylleucine-Lysozyme 50

Diana S. Beattie. The Submitochondrial Distribution of the Fatty Acid Oxidizing System in Rat Liver Mitochondria 57

Harold L. Segal, George J. Abraham, and Takeo Matsuzawa. Interaction of Rat Liver Alanine Aminotransferase with L-Proline 63

Patrick Brennan and Clinton E. Ballou. Phosphatidylmyoinositol Monomannoside in *Propionibacterium shermanii* 69

A. E. Pegg and H. G. Williams-Ashman. Stimulation of the Decarboxylation of S-Adenosylmethionine by Putrescine in Mammalian Tissues 76

G. A. Vigers and F. D. Ziegler. Azide Inhibition of Mitochondrial ATPase 83

H. Bruce Bosmann and Edwin H. Eylar. Attachment of Carbohydrate to Collagen. Isolation, Purification and Properties of the Glucosyl Transferase 89

Fusaoki Koide, Iwao Suzuka, and Kiichi Sekiguchi. Some Properties of an Adenine-Rich Polynucleotide Fragment from the Avian Reovirus 95

F. J. Ballard and R. W. Hanson. Factors Controlling the Concentration of Mitochondrial Oxaloacetate in Liver during Spontaneous Bovine Ketosis 100

John Lee and M. D. Winans. Light Yields from Soluble Versus Insoluble Extracts of the Bioluminescent Marine Dinoflagellate, *Gonyaulax polyedra* 105

Number 2, January 25, 1968

C. Kutzbach and E. L. R. Stokstad. Partial Purification of a 10-Formyl-Tetrahydrofolate: NADP Oxidoreductase from Mammalian Liver 111

T. Sugiyama, N. Nakayama, and T. Akazawa. Activation of Spinach Leaf Ribulose-1,5-Diphosphate Carboxylase Activities by Magnesium Ions 118

M. Kohoutová, H. Braná, and I. Holubová. Isolation and Purification of a Substance Inducing Competence and Inactivating Transforming DNA in Pneumococcus 124

Carmen Gomez Leonard, Alba E. Colón, and Roger M. Cole. Transduction in Group A Streptococcus 130

Roy Repaske and Colette L. Dans. A Factor for Coupling NAD to Hydrogenase in *Hydrogenomonas eutropha* 136

Nathan Nelson and Joseph Neumann. Interaction between Ferredoxin-NADP Reductase from Chloroplasts 142

Jean-Pierre Ebel, Jacques-Henry Weil, Gisèle Beck, Claudine Bollack, Louis Colobert, and Pierre Louisot. Inhibition of the Multiplication of Myxovirus and Arbovirus by Chemically Modified Ribonucleic Acids from the Host Cells 148

J. Doskocil and V. Paces. The Effect of Nucleosides on the Phosphorolysis of Thymidine by Normal and Phage-Infected Cells of *E. coli* 153

Glenn N. Cunningham, Stephen B. Maul, and William Shive. Multiple Interactions of Threonine with an Aspartokinase–Homoserine Dehydrogenase Complex 159

Lorin R. Thompson and Brian J. McCarthy. Stimulation of Nuclear DNA and RNA Synthesis by Cytoplasmic Extracts *in Vitro* 166

A. P. Kraus, M. F. Langston, Jr., and B. L. Lynch. Red Cell Phosphoglycerate Kinase Deficiency: A New Cause of Non-Spherocytic Hemolytic Anemia 173

George Wasemiller, Arnold Abrams, and Seymour Bakerman. Fluorescence Studies on Components of Human Erythrocyte Membrane 17
T. Keleti. Fluorescence of D-Glyceraldehyde-3-Phosphate Dehydrogenase-Substrate Complexes 18
R. K. Ralph. A Possible Explanation for Inosine in Anticodons 19
G. J. Kelly and J. F. Turner. Inhibition of Pea-Seed Phosphofructokinase by Phosphoenolpyruvate . 19
Olga O. Blumenfeld. The Proteins of the Erythrocyte Membrane Obtained by Solubilization with Aqueous Pyridine Solution 20

Number 3, February 15, 1968

S. R. Ayad and J. Blamire. Fractionation of *Bacillus subtilis* DNA by Use of Poly-L-Lysine Kieselguhr Columns 20
Elizabeth H. Asheshov and K. G. H. Dyke. Regulation of the Synthesis of Penicillinase in Diploids of *Staphylococcus aureus* 21
F. Taketa, M. R. Smits, and J. L. Lessard. Hemoglobin Heterogeneity in the Cat 21
Brenda Withers, I. ab I. Davies, and C. H. Wynn. The Purification of Lysosomes by Isopycnic Zonal Ultracentrifugation 22
Piotr P. Slonimski, Gisèle Perrodin, and James H. Croft. Ethidium Bromide-Induced Mutation of Yeast Mitochondria: Complete Transformation of Cells into Respiratory Deficient Nonchromosomal "Petites" 23
G. Walter, W. Seifert, and W. Zillig. Modified DNA-Dependent RNA Polymerase from *E. coli* Infected with Bacteriophage T_4 24
Daniel H. Hug and Dennis Roth. Inhibition of Histidine Deaminase by L-Tyrosine and *p*-Hydroxyphenylpyruvate 24
William H. Welch, Carol L. Irwin, and Richard H. Himes. Observations on the Monovalent Cation Requirements of Formyltetrahydrofolate Synthetase 25
Luigi Casola and Bernard W. Agranoff. Release of RNA from Goldfish Brain Nuclei by Sodium Dodecyl Sulfate 26
A. O. A. Miller. Dissociation of HeLa Cells Ribosomes by Heparin 26
Kelvin K. Ogilvie and Robert L. Letsinger. Deaminase Activity of Commercial Spleen Phosphodiesterase 27
Nobuo Tanaka, Tadatoshi Kinoshita, and Hiroshi Masukawa. Mechanism of Protein Synthesis Inhibition by Fusidic Acid and Related Antibiotics 27
J. C. Brown and P. Doty. Protein Factor Requirement for Binding of Messenger RNA to Ribosomes 28
D. des S. Thomas and R. G. Stanley. Glycerol Activation of Glucan Synthesis in Cell-Free Preparations from *Lupinus albus* 29
C. I. Pogson. Two Interconvertible Forms of Pyruvate Kinase in Adipose Tissue 29
F. H. White, Jr. and P. Riesz. The Free-Radical Interceptor Technique as a Means for the Preparation of Tritiated Proteins 30
Richard Ward, Mette Strand, and Raymond C. Valentine. Translational Repression of f2 Protein Synthesis 31
W. J. Wechter and A. J. Mikulski. Gradation of Specificity with Regard to Sugar among Nucleases 31
J. C. M. Tsibris, M. J. Namtvedt, and I. C. Gunsalus. Selenium as an Acid-Labile Sulfur Replacement in Putidaredoxin 31
Erratum 31

Number 4, February 26, 1968

Irving Listowsky and Sasha Englard. Characterization of the Far Ultraviolet Optically Active Absorption Bands of Sugars by Circular Dichroism 3
